This is a summary of the key features of **Old Mutual Protect Business Life Cover** to help you to decide if this may be right for your business.

Please read this with the **About Old Mutual Protect** key features document to understand the common product features, exclusions and other insurance terms we use.

COMPARING SEVERE ILLNESS PRODUCTS

The Association for Savings & Investment SA created standardised industry definitions to help you compare severe illness products. This means your claim is assessed against a minimum standard for the 'big four' illnesses of cancer, coronary artery bypass graft, heart attack and stroke. These four illnesses make up 70% to 90% of all severe illness claims paid in South Africa.

The Standardised Critical Illness Definitions Project defined four severity levels for each of the 'big four' illnesses. The tables below show the percentage of the cover amount we will pay.

Severe Illness Cover (added to Business Life Cover)

| Illness or condition | Severity A (most severe) | Severity B | Severity C | Severity D (least severe) |
